Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

The indicated allowability of claims 4-7 and 19 is withdrawn in view of the newly discovered reference(s) to Van Dijsseldonk et al. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 2, 4-7, 12, 14-17, 19, 20 and 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Van Dijsseldonk et al.

In regard to claims 1, 2, 5-7 and 16-17, Van Dijsseldonk et al discloses a deformable optical system comprising a reflection device (33) having a first reflecting surface and a second (back) surface; an integrated circuit actuator having movable extensions (ends of actuators 31,32) extending from a support surface of a support (11) and coupled to the second surface; electrodes individually coupled to corresponding ones of the extensions (page 6, paragraph 0065, lines 5-7); controller (26) coupled to the electrodes to control the movement of the extensions; and a measuring system (22-24) that measures a wavefront aberration (page 5, paragraph 0056). See Figs. 4 - 6 and the accompanying text.

In regard to claims 4 and 19, the recited feature inherently disclosed for conducting control signals from the controller (26).

In regard to claims 12 and 20, since the radius of the reflective device is very large, the reflective device is considered substantially flat.

In regard to claim 14, see Fig. 6.

In regard to claims 15 and 22, the claimed dimension of the extensions is inherently disclosed because there is no boundary of the range.

Allowable Subject Matter

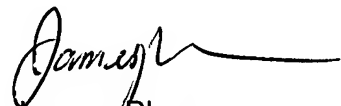

Claims 3, 9-11, 18 and 26-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the cited references teaches or suggests a deformable optical device having the combined features recited in each of claims 3, 9-11, 18 and 26-27.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Phan whose telephone number is (571) 272-2317. The examiner can normally be reached on Monday-Friday.
